KOMAR STROY

ABOUT THE PARTNERSHIP

Bespoke cabinetry, built to your spec.

Novacreata and Komar Stroy craft fully custom kitchens, office cabinetry, and built-in millwork — engineered to millimeter precision and finished to order, paired with precision-fabricated quartz countertops. From a single residence to multi-unit developments, we deliver design, fabrication, and installation under one roof.

100%

custom layouts,
sizes & finishes

3/4"

plywood box
construction

360°

design, fabrication
& installation

PREMIUM UPGRADE Blum hardware available on request.

WHY WORK WITH US

Built for professionals.

True Custom

Every cabinet made to your exact dimensions, layout, finish, and configuration — no stock sizes.

Built to Last

Durable 3/4" plywood box construction engineered for decades of daily use.

Cabinetry + Stone

Cabinets and precision-fabricated quartz countertops delivered together, by one team.

Premium Finishes

Gloss, matte, and woodgrain fronts with a wide range of decorative handles and hardware.

Trade-Focused

Serving homeowners, architects, GCs, developers, and design professionals alike.

Design to Install

Layout planning, fabrication, and professional installation handled end to end.

WHAT WE MAKE

Three disciplines, one standard.

Custom Kitchens

Fully bespoke cabinetry engineered to your floor plan, with functional storage and premium fronts.

Office & Millwork

Built-in office cabinetry, media walls, and storage millwork for commercial and residential interiors.

Quartz Countertops

Precision-fabricated quartz surfaces — durable, non-porous, and templated to install seamlessly.

CUSTOM KITCHEN CABINETRY

Kitchens made to measure.

Fully customizable layouts, dimensions, finishes, and configurations — designed around your space, your appliances, and the way you actually cook.

- ✓ Any layout: galley, L-shape, U-shape, island & peninsula
- ✓ Gloss, matte & woodgrain fronts in a wide color range
- ✓ Handleless finger-pull, U-channel, pivot & decorative handles
- ✓ Soft-close hardware included as standard on every door
- ✓ Two-tone schemes & floor-to-ceiling tall cabinetry

PROJECT SHOWCASE

Kitchens in every aesthetic.

Oak uppers with lift-up door

Full-height pull-out larder unit

Woodgrain display & wine storage

White gloss with built-in oven

OFFICE CABINETRY & MILLWORK

Built-ins that work harder.

Custom office cabinetry, media walls, credenzas, and storage millwork — engineered for commercial and residential interiors with the same precision as our kitchens.

- ✓ Home offices, reception desks & conference credenzas
- ✓ Floor-to-ceiling storage walls & display cabinetry
- ✓ Glass-front uppers, open shelving & wine cubbies
- ✓ Integrated quartz countertops & waterfall ends
- ✓ Finishes coordinated across the whole interior

HANDLES & DOOR PROFILES

Clean lines, your way.

45° Mitered Finger-Pull

A precision 45-degree mitered edge forms an integrated finger-pull — a fully handleless, seamless front with crisp geometry and no hardware to interrupt the surface.

U-Channel Pull

A continuous recessed U-channel runs behind the door and drawer edge, giving an effortless grip and a minimal, architectural look across gloss, matte, and woodgrain fronts.

Handleless Slab Fronts

Flat slab doors with concealed or push-to-open mechanisms create uninterrupted, hardware-free runs — ideal for statement cabinetry and tight, modern layouts.

FINISHES & DECORATIVE HARDWARE

A finish for every project.

Beyond integrated pulls, choose from a wide range of decorative handles and finishes to match the architecture — warm metals, matte black, brushed steel, and brass.

- ✓ Door fronts in gloss, matte & textured woodgrain
- ✓ Bar pulls, T-bars, edge pulls & knobs in many finishes
- ✓ Matte black, brushed nickel, brushed brass & chrome
- ✓ Two-tone & mixed-material fronts for depth
- ✓ Color matching to coordinate the full interior

FUNCTIONAL STORAGE

Every cubic inch, working.

Lazy Susan Corner

Rotating swing-out carousels turn dead corner space into easy, full-access storage.

Pull-Out Waste Bin

A concealed bin on full-extension runners keeps waste hidden behind a matching front.

U-Channel Pull Drawers

Deep drawers on full-extension runners with organized, easy-reach interiors.

CORNER STORAGE SYSTEMS

No more lost corners.

Corners are the most wasted space in a kitchen. We put them to work with engineered pull-out and rotating systems that bring everything within reach.

- ✓ Blind corner cabinet solutions with Rev-A-Shelf hardware
- ✓ Soft-close kidney & D-shaped Lazy Susan carousels
- ✓ Full-extension glides that pull shelving out to you
- ✓ Left- or right-hand configurations to suit any layout
- ✓ Sized to your cabinet run, not off-the-shelf

QUARTZ COUNTERTOPS

Surfaces that perform.

Precision-fabricated quartz countertops — engineered for everyday life and templated, cut, and installed by our team to pair seamlessly with your cabinetry.

- ✓ Non-porous by nature — never needs sealing
- ✓ Stain, scratch, and moisture resistant for daily use
- ✓ Consistent color and veining across every slab
- ✓ Mitered edges, waterfall ends, and full-height splashes
- ✓ Integrated sink and cooktop cutouts — templated to install

QUARTZ COLORS & PATTERNS

A surface for every design.

Calacatta

Soft grey, gold accents

Calacatta Gold

Warm taupe-gold veining

Statuario

Crisp white, grey vein

Aurora Gold

Fluid gold movement

Bold Vein

High-contrast statement

Midnight Fracture

Dramatic dark mosaic

A selection from our range — hundreds of quartz colors and finishes can be specified, from minimal whites to bold, high-movement statement slabs.

WHY QUARTZ

Engineered to outlast trends.

~90% Natural Quartz

Crushed natural quartz bound with high-performance resins for a surface harder than most natural stone.

Non-Porous & Hygienic

Sealed for life — liquids can't penetrate, so it resists stains and won't harbor bacteria, mold, or mildew.

Design Predictability

Uniform color and veining from edge to edge mean dramatic waterfalls and long spans without the cracking risk of natural stone.

Virtually Maintenance-Free

Day-to-day care is a soft cloth and warm water. No annual sealing, and no restoration cost down the line.

CONSTRUCTION & MATERIALS

Built on 3/4" plywood.

The cabinet box is the skeleton of the kitchen. We build ours from durable 3/4" plywood — the standard premium manufacturers rely on for strength, stability, and longevity.

- ✓ Cross-laminated plies resist warping, sagging & dents
- ✓ Superior screw-holding for hinges, runners & countertops
- ✓ Better moisture recovery than particleboard cores
- ✓ Engineered to last decades, not a few short years
- ✓ Precision-bored panels for repeatable, tight assembly

PREMIUM HARDWARE

Quality you feel every day.

INCLUDED AS STANDARD

Premium Soft-Close Hardware

- ✓ Soft-close hinges & full-extension drawer runners
- ✓ Smooth, silent operation rated for daily use
- ✓ Three-dimensional adjustability for tight, even gaps
- ✓ Included on every cabinet — never an upgrade fee

PREMIUM UPGRADE

Blum Hardware — On Request

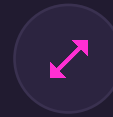

- ✓ BLUMOTION soft-close on hinges & runners
- ✓ LEGRABOX & TANDEMBOX drawer systems
- ✓ TIP-ON touch-to-open for handleless fronts
- ✓ Specialty hinges for blind corners & Lazy Susans

2026 DESIGN TRENDS

What clients are asking for now.

**Warm Natural Wood**

White oak and walnut woodgrain fronts lead the market as homeowners move away from cold, all-white kitchens toward warmth and visible texture.

**Seamless & Handleless**

Flat-slab fronts, integrated finger-pulls, and push-to-open systems create uninterrupted, architectural cabinet runs.

**Two-Tone & Mixed Materials**

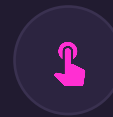

Contrasting uppers and lowers — and combinations of wood, matte, gloss, glass, and metal — add depth and define zones.

**Engineered Storage**

Buyers now invest in internal organization: deep drawers, corner pull-outs, hidden waste, and bespoke dividers.

**Statement Quartz**

Full-height stone backsplashes and dramatic veining turn the countertop into the kitchen's focal point.

**Quiet, Tactile Luxury**

Matte finishes that resist fingerprints, warm metal hardware, and soft-close motion signal craftsmanship over flash.

WHO WE SERVE

Custom solutions for any interior.

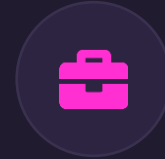

Residential

Homeowners and designers building dream kitchens, pantries, and built-ins — one room or a full-home package.

Commercial

Offices, hospitality, retail, and multi-unit developments needing durable, design-consistent cabinetry at scale.

Trade & Professionals

Architects, GCs, and developers who need a reliable fabrication partner from shop drawings to installation.

HOW IT WORKS

From first measure to final install.

01**Design & Measure**

On-site measurement and layout planning around your space, your appliances, and how you work.

02**Material & Finish**

Fronts, finishes, hardware, and quartz selected from our full range — coordinated in one palette.

03**Precision Fabrication**

Every cabinet and countertop cut, bored, and assembled to millimeter tolerances in our shop.

04**Professional Install**

Our own team delivers and installs — gaps, seams, and reveals aligned for a clean, finished result.

KOMAR STROY

LET'S BUILD YOUR NEXT PROJECT

Custom kitchens, office cabinetry & quartz countertops — from design to installation.
