OUR WORK

Built to last. Finished to impress.

Novacreata's completed work spans storefronts, glass facades, canopies, railings, and custom window systems. Now partnered with Komar Stroy, we pair that proven track record with premium European facade and glazing systems.

PROJECT 01

88 Wall Street

Glass Storefront & Curtain Wall · Financial District,
Manhattan, NY

Full-scale glass curtain wall and storefront system on a landmark Financial District building. Novacreata managed fabrication, precision rigging, and overnight installation coordinated with building operations in one of NYC's most demanding environments.

- Structural glass curtain wall — multi-floor scope
- Thermally broken aluminum frames, dark bronze finish
- Large-format tempered glass panels throughout
- Overnight rigging & delivery — Lower Manhattan

PROJECT 02

10 Byron Place

Glass Entrance Canopy · Larchmont, NY

Elegant glass and polished stainless steel entrance canopy for a luxury residential high-rise. Custom-designed structural frame with point-fixed laminated glass creates a dramatic covered entry anchoring the building's street presence.

- Custom stainless steel structural canopy frame
- Point-fixed laminated safety glass panels
- Integrated cable tie-backs & stainless hardware
- Turnkey fabrication, delivery & installation

PROJECT 03

212 West 95th Street

Glass Canopy · Upper West Side, Manhattan, NY

Modern dark aluminum and glass entry canopy for a residential building on Manhattan's Upper West Side. Flat-profile canopy with tinted glass and thermally broken framing, installed with concealed drainage.

- Dark thermally broken aluminum frame
- Tinted tempered glass panels
- Concealed integrated drainage system
- Turnkey fabrication, delivery & installation

PROJECT 04

Bank of America

Interior Glass Railings · Long Island, NY

Custom interior glass railing system installed throughout the Bank of America commercial lobby. Floor-mounted posts in brushed bronze with structural tempered glass and a continuous wood cap rail — delivered to exact architectural specifications.

- 3/4" tempered clear glass panels
- Bronze-finish stainless steel post system
- Continuous hardwood cap rail
- Custom fabrication to architectural specs

PROJECT 05

CLK Building

Storefront & Glass Railings · Long Island, NY

Full-height aluminum-and-glass storefront and exterior glass railing package for a modern commercial building on Long Island. Floor-to-ceiling glazing with a frameless glass double-door entry, framed by stainless-post glass guardrails lining the entrance ramp and steps.

- Full-height aluminum storefront system
- Frameless glass double-door entry
- Stainless-post glass guardrails — ramp & steps
- Full scope: fabrication, delivery & install

PROJECT 06

100 Bogart Street

Aluminum Storefront · Bushwick, Brooklyn, NY

Bold custom red-framed aluminum storefront for a new mixed-use development in Bushwick. Wide structural mullions, full-height glazing panels, and a commercial double entry door create a striking identity for the ground-floor retail space.

- Custom RAL red powder-coated aluminum framing
- Full-height structural glazing panels
- Commercial double-door entry system
- Complete storefront system — multi-unit scope

PROJECT 07

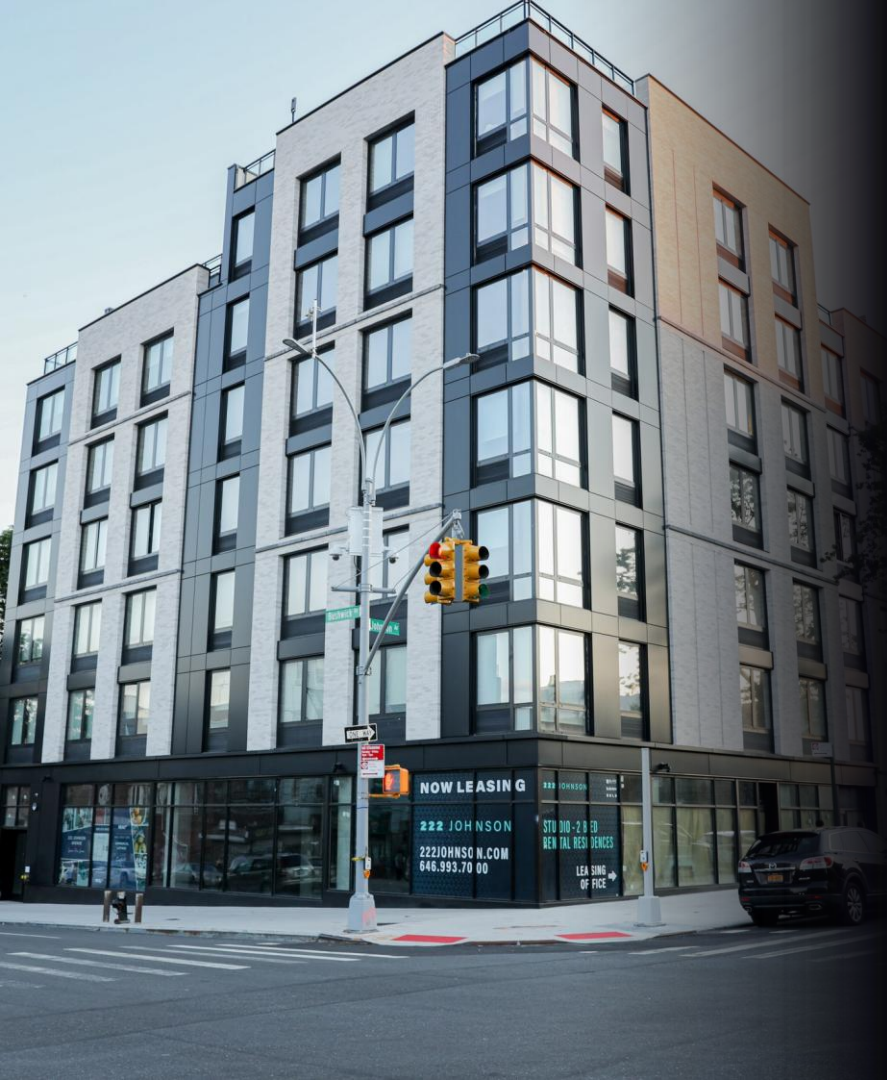

201 East 26th Street

Full-Glass Storefront · Gramercy, Manhattan, NY

Contemporary full-glass storefront and entry vestibule for a modern mixed-use building in Gramercy. Minimal dark-framed glazing maximizes natural light, with upper panels extending through the second level for a seamless continuous facade.

- Dark aluminum minimal-frame storefront system
- Multi-story continuous glazing configuration
- Commercial-grade entry door system
- Turnkey installation — occupied building

PROJECT 08

222 Johnson Avenue

Dark Aluminum Storefront · Bushwick, Brooklyn, NY

Large-scale matte dark aluminum storefront for the 222 Johnson Avenue residential development. Clean modern ground-floor commercial glazing across the full building frontage with wide-format glass panels, coordinated on an active construction schedule.

- Matte dark aluminum storefront system
- Wide-format glass — full building frontage
- Multiple access door openings
- Coordinated with active construction schedule

PROJECT 09

Custom Shower Enclosures

Residential Glass Enclosures · NYC Metropolitan Area

Custom frameless and semi-frameless glass shower enclosures fabricated and installed across multiple luxury residences. Each enclosure is precision-cut from tempered safety glass in clear, frosted, and specialty finishes, and fitted with premium hardware.

- 3/8" & 1/2" tempered safety glass
- Frameless & semi-frameless configurations
- Chrome, brushed nickel & matte black hardware
- Custom-cut per project — multiple residences

PROJECT 10

W 42nd Street

Custom Kitchen Cabinetry · Midtown Manhattan, NY

Fully custom kitchen cabinetry designed, fabricated and fitted for a W 42nd Street residence. Full-height high-gloss uppers run flush to the ceiling over integrated appliance surrounds, and every door and drawer moves on concealed European soft-close hardware.

- Custom cabinetry built to exact room dimensions
- Fitted modern design — full-height gloss slab fronts
- 110° adjustable soft-close hinges & undermount runners
- Quartz countertop, glass backsplash & integrated appliances
